
- Maximum details on the surface of the scene. This value can be modified directly in the file settings.xml. - It is recommended that you leave the default value at the middle value in order to ensure the best performance. - Pedal and vehicles are only visible when the camera is looking directly at them. - Low value: high details on the surface. - Default value: maximum details. - This value does not modify the number of vertices in the polygons. It only determines how detailed the LOD is. If you want to have fewer details on the polygons, then you can go for lower values for this value. - High value: less details on the surface. - Pedal and vehicles are visible even when the camera is looking away from them. - Default value: maximum details. - This value does not modify the number of vertices in the polygons. It only determines how detailed the LOD is. If you want to have fewer details on the polygons, then you can go for lower values for this value. - High value: less details on the surface. - Pedal and vehicles are visible even when the camera is looking away from them. - Default value: maximum details. - This value does not modify the number of vertices in the polygons.
