Since the International Space Station (ISS) re-supply ships (like Russia's Progress and Japan's H-II) have moved beyond the orbit of the Moon, and are instead headed towards a rendezvous with an ISS crewmember (called 'Earth Return' in the industry), there's been plenty of talk about whether or not the ISS astronauts will get to re-enter Earth's atmosphere and eventually splash down on a near-term ocean beach somewhere. We may know the answer by the end of this week. The first crew member to the ISS, Kazakhstan's Fyodor Yurchikhin will leave the station on Wednesday, and he'll be bringing with him a return capsule. This capsule holds the amount of air that would enable Yurchikhin to re-enter Earth's atmosphere, were he to depart now. Japan's HTV cargo craft, which arrived in the U.S. this week, carries a return capsule as well. Unfortunately for folks outside the U.S., HTV-8 is currently in storage, and won't be getting ready to start its return mission to Earth until the end of the month. However, once it does get packed up, HTV-8 will deliver some important cargo for the ISS astronauts returning home on Russia's Soyuz TMA-18M spacecraft. So what does this all mean? Well, if we ask Russian cosmonauts and cosmonaut trainers, they'll tell us that if a crewmember were to launch this week (at the

Fold Defy automatically applies crinkles to your pictures. It lets you apply pre-made fold templates to bend and swirl your photos. Meanwhile, you can customise your own paper-like texture to fold or crumple your photos to create realistic 2D and 3D effects. This application is compatible with pictures in the JPEG, PNG, TIFF, PSD and GIF formats.

**Fold Defy Features:**

- ? Optimise your photos instantly Fold Defy efficiently applies powerful 3D lighting and folding effects to your pictures with maximum precision.
- ? Let your images meet your imagination With a wide range of customizable templates, you can easily transform your pictures to look like crumpled paper.
- ? Designed with a modern look This application makes it a breeze to use, thanks to its modern, minimalist style, fully integrated 3D lighting and powerful paper texture.
- ? Fully adjustable light With the help of powerful light effects, you can adjust the shadow strength, shadow height and texture to create the desired effect.
- ? Useful metadata info Fold Defy automatically recognises the information including the date, the time and the place of the creation.
- ? Highly-detailed help The application has a detailed and in-depth help that also covers the technical aspects such as the result preview.
- ? Windows Phone 7 compatibility Fold Defy is fully compatible with Windows Phone 7, which is a must if you use this application.

Microsoft still consider the Windows Phone 7 to be a niche product, and their apps are often neglected. However, there are quite a few nice apps that have been created for the platform, with the primary focus of these apps is to make the Windows Phone a bit more desktop-like, or use it on the go. For those looking for a new app that offers a touchscreen friendly experience on their Windows Phone 7 device, S-Image is definitely worth looking at. S-Image is a part of the S-App application suite, and after looking at the feature list, you would instantly think that the application is another snap-on app for the Windows Phone 7. However, unlike other apps within the suite, S-Image is meant to be installed alongside the main Windows Phone 7 on-screen keyboard, and once installed, it will be used in conjunction with it. S-Image can be thought of as a app that lets you scan (or copy and paste) text from an image. In other

Are you looking for a quick and convenient way to fold photos and make them look realistic? Do you want to quickly transform your photographs into professional-quality pieces of art, rather than simply transforming them into collages? Fold Defy will help you to change your photo into a spectacular piece of art by simply folding or crumpling them. The software's dedicated user interface is quick, easy to use and optimized for your average-sized storage devices. It is only a few mouse clicks away! With no special skills needed, it becomes very easy to produce stunning, sophisticated-looking photo collages by simply creating folds or crinkles in them. You can apply different styles and effects to them, such as the classic and contemporary paper textures, 3D lighting, shadow and 3D perspective effects that are all customizable. Fold Defy offers you an easy way to create and instantly share your folded work of art with your friends.

**Feature Highlights:**

- \* 20+ built-in styles, including a paper texture library, that can be easily applied to make your photos look like folded pieces of paper.
- \* Preset options for automatic preset settings for different types of images.
- \* The unique, automatic 3D lighting system that can give your photos realistic folds, crinkles, creases and creasing, without needing to manually adjust shadows.
- \* The powerful photo editing system that allows you to modify the placement of the shadows, and to adjust the intensity and direction of the light, as well as the shadow color and intensity.
- \* Adjustable camera shake features that ensure that your pictures are not blurred.
- \* Supports resized images and can make full resolution images fit the screen.
- \* Various photo effects for creating professional-level photo collages.
- \* Create and share your photo collages with your friends and family instantly.
- \* Supports all major operating systems, including Windows 7/8, Windows 10 and Linux.

**Key Features:**

- \* A professional-grade application that offers you a quick and convenient way to
